Amendments To The Specification:

Please amend paragraph [0010] at page 3 as follows:

[0010] The use of internet protocols for the purpose of communications between the software modules and for communications between the software modules and components outside the web server makes it possible to standardize the components of the web server in respect of their communication interfaces. The extension of the web server to incorporate further modules is facilitated since these can be used without requiring costly customization to proprietary protocols. Examples of normal internet protocols are HTTP and ~~and~~ FTP (File Transfer Protocol).

Please amend paragraph [0023] at page 10 as follows:

[0026] To summarize, the invention thus relates to a web server comprising software modules that are integrated into the web server, whereby at least one first software module 37 has first means for the non-proprietary implementation of an automation functionality and second ~~secondary~~ means 63, 65 for accessing a realtime operating system 52.
